

## Electrical Safety Recall

**Product Description** - Grundfos Pumps Pty Ltd has been made aware of a production fault in a small percentage of the JP Rain, JPB and NSB product range sold within Australia.

**Affected Part Numbers** - for JPRain, JPB and NSB please refer to product recalls website. The Production codes are N1 0945 to N1 1027 inclusive. Production codes can be found on the labelling of the pumps terminal box.

**Defect** - In a small percentage of these products, the wires in the terminal box are pinched under terminal box lids.

**Hazard** - This defect may result in an electrical short circuit, which may create an electric shock hazard.

**What to do** - If the pump is installed and operating, the affected pump should be disconnected from its power source and not used. Under no circumstances should the pump unit be touched before being disconnected from its power source.

**Contact Details** - Grundfos Pumps Pty Ltd is contacting owners directly according to name and address information held by its Authorised Dealer network. If you believe that your unit could be affected, please contact your nearest Authorised Grundfos Dealer or contact:
